Dear Calculus Student

I am pleased you have chosen to take AP Calculus for the 2009/2010 school year. It is a challenging course but well within the abilities of a good student. In order to have the best success learning the new topics presented in my course it is necessary to review math you learned in previous years. I am sending you a link to a web page containing your summer assignment. Please follow the link to Calculus AB Summer Assignment 2009 and complete the worksheet. I do not expect the assignment to take more than three or four hours to complete. Also, please note that since this class is no longer part of International Baccalaureate this is not the same assignment as last summer.

In addition to doing this work please send an email to tbixler@syvuhd.org with Calculus 2009 in the subject line and your name and contact information in the body of the email. The email, correctly sent, will count as your first homework assignment.

I look forward to meeting you in the fall. Please enjoy the rest of your summer.

The link to the summer homework assignment is:
